

Mission

Pivot Group is the ONLY unbiased firm that solely focuses on information security services. We accomplish this by tailoring solutions, rather than selling or reselling technology. By meeting the business and budget requirements of our clients, we deliver the complete life cycle of security services.

History

Pivot Group started in 1999 as a security technology firm that developed its own proprietary technology. We sold the technology rights to another company in 2001 and changed the focus of the firm so we could deliver the unmet need:

Tailored Information Security Solutions.

Our clients truly appreciated our change of strategy because it gave them the opportunity to be personally involved with the entire security process for their companies. Pivot Group's holistic approach to security and unprecedented passion to deliver the highest level service allows us to enjoy the success of truly satisfied clients, including over an 85% referral rate, as well as manageable growth.

look, plan, act, repeat

Road to Successful Information Security Methodology

look Business Assessment - Evaluate your information assets, current technology and upcoming needs, as well as industry-related regulatory compliance issues to ensure prioritization and protection of the key business aspects supported and/or accessible by technology.

Vulnerability Assessment - Assess your current levels of protection against threats, including internal and external tests and reviews of your overall security policy.

plan act Strategy and Action - Align your security policies with the most cost-effective security solutions available. Pivot Group will provide recommendations and a detailed action plan including cost breakdowns for each level of protection.

***The key to Pivot Group's approach is providing appropriate protection at an appropriate price.

repeat Continuously assess your company's business requirements versus its security posture to get the most return on your security investment.
